

SUPERCUT XPM

portable milling and sawing machine

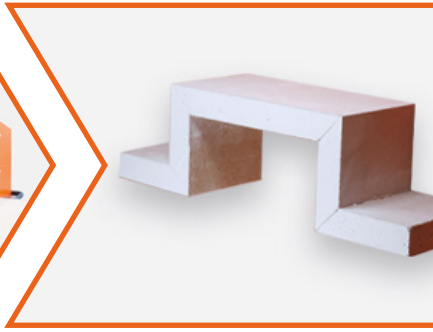

Self-
propelled

work smart.

Professional equipment

Easy moulded part production

Impressive results

Applications

- ✓ Milling, sawing
- ✓ Making cut-outs and templates
- ✓ Machining of various panel materials
- ✓ One-man operation
- ✓ Production of moulded parts

Features

- ✓ Flow-optimized, precise dust extraction
- ✓ Convenient laser adjustment
- ✓ Powerful motors
- ✓ Extension modules
- ✓ Interchangeable units
- ✓ Handy dimensioning
- ✓ Self-propelled units

Advantages

- ✓ Simplified production processes
- ✓ Savings in time, personnel and costs (up to 75 %)
- ✓ Ease of operation
- ✓ Flexibility or independence from suppliers
- ✓ Transport and assembly of the molded parts in one piece
- ✓ No profiling and filling work necessary
- ✓ Virtually dust-free environment
- ✓ High moulded part stability and impact resistance
- ✓ Fast and inexpensive moulding production
- ✓ Production of three-dimensional molds
- ✓ Increased mobility, site-independent work

SUPERCUT

XPM

Details

Length:	3000 mm (total)
Width:	2280 mm (incl. units)
Height:	2400 mm (incl. units)
Weight:	11 kg
Feed rate:	8m/min (adjustable)

Dimensions of panel processing

Cutting length: max. 2550 mm
Max. cutting depth: max. 42 mm

Areas of application

Cladding (beams, tubes, Support beams), round arches, ceiling trim, light coves, niches, boxes, window reveals, free-standing wall ends

Panel materials

Plasterboard, aluminum composite, Eternit, Fermacell, fireboard, wood, laminate, plastic, MDF, parquet, etc.

Accessories:

- Extension modules to increase the working area
- Powerful milling and sawing units in different variants
- High-quality tools (milling cutters, saw blades, etc.)
- Powerful extraction systems
- Professional gluing systems
- Aluminum Profile elements to complement our portfolio

Our leasing and financing offers enable a fast return on investment of the equipment.

We are happy to provide individual consultation on our products as well as on the topics of financing, subsidies, workplace planning, molded parts, etc.

Outstanding quality

Portable system

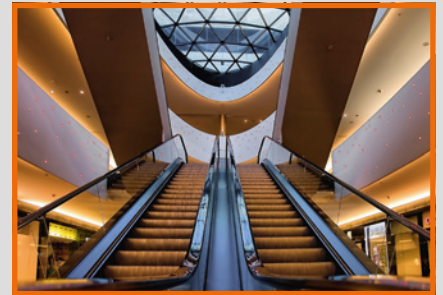

Three-dimensional
molded parts

Effective prefabrication

Endless possibilities

Best design results

We look forward to hearing from you!
